ACADEMIC PROJECTS

Email Inbox program developed using C, Computer Science, VCU, Richmond, VA

- Allowed user to show inbox, sort inbox by ID and sender, delete email by ID, show email by ID, search for an email in the inbox using a keyword, and exit inbox
- Showcased how the functionality worked by using a sample of 10 emails that were given to us by our instructor.
- Utilized Structs, memory allocation, and Q Sort Algorithm.

PERSONAL PROJECTS

Personal Portfolio Website developed using Python, HTML

- Project code: <https://github.com/ahmadkdannouf/personal-portfolio>
- Website link: www.adannouf.com
- Built a personal portfolio site with a blog section using Django
- Utilized Bootstrap to design a responsive website.

NBA player stat finder GUI programmed using Python

- Project code: <https://github.com/ahmadkdannouf/NBAStatsGUI>
- Allowed user to input any current NBA player, and their career stats will be outputted.
- Implemented the Tkinter library to create the GUI. An API from rapidapi.com was used to retrieve the data of all current NBA players.

PROFESSIONAL EXPERIENCE

Education Support Specialist, John Tyler Community College, Richmond, VA September 2021 - Present

- Proctored students while they took their tests virtually and in person.
- Communicated to students and professors via email or phone call regarding setting up the student's tests.
- Assisted students through any technical difficulties they had while taking virtual tests.
